## Xennia™ Amethyst

High performance reactive inks for digital textile printing

## Xennia™ Amethyst

### Unparalleled performance in reactive printing

Xennia™ Amethyst offers excellent color performance with high vibrancy and an extended color gamut. It is suitable for printing onto cotton, viscose and other textiles, with superb jetting and fastness properties.

### Excellent color and fastness properties

Xennia™ Amethyst gives market-leading color vibrancy, an extended gamut and high consistency in color shade and density. Amethyst also shows excellent wash- and light-fastness, resistance to acid & alkali perspiration and dry & wet crock fastness against stringent ISO standards, offering assurance to consumers looking to deliver the highest quality and value to the market.

Xennia™ Amethyst is designed for use in high performance digital textile printing systems. When used with a recommended system, Amethyst delivers excellent print quality, outstanding productivity and reliability.

For more detailed product information and available inks please go to:

[www.sensientinkjet.com/xennia\\_amethyst](http://www.sensientinkjet.com/xennia_amethyst)

### Ideal for digital decoration of fashion apparel and soft furnishing fabrics

Used as part of a digital fabric decoration process, Xennia™ Amethyst is a waterbased, environmentally responsible ink offering excellent print quality when printed onto cotton, silk, viscose rayon, linen, wool and lyocell textiles. Amethyst is a high performance ink with excellent productivity and outstanding quality.

### Regulatory Excellence

21<sup>st</sup> century manufacturing calls for low impact inks that meet regulatory and environmental requirements. Amethyst has been designed with sustainability and compliance at its forefront, giving customers peace of mind when printing any design in any location for any brand. Xennia™ Amethyst is registered for GOTS and Sensient's highly specialized regulatory team can work with you to define and deliver the standards you require.
